Особенности продукта  
Product Features

Bank of China: в соответствии с дизайнерскими идеями Bank of China очки передают силуэт и детали здания, используя только металл из нержавеющей стали и нейлоновые линзы в качестве оправы и дужек, чтобы выразить ощущение современности и технологий. трогать.

Фантазия бабочки: очки, вдохновленные бабочками, передают поток их танцующих движений. Каждая линза может вращаться вверх и вниз для создания асимметричного эффекта и цветовых вариаций.

Красная нить: на основе китайской старой поговорки, красная нить, которая связывает узел между двумя людьми. Вы можете найти лица влюбленных, нанесенные лазером на объектив, когда металлическая проволока (символизирует нить) проходит через всю раму без пайки. и никаких винтов, чтобы создать ощущение минимализма.

Bank of China: In accordance with the design ideas of Bank of China, the eyewear captures the silhouette and details of the building by using only stainless steel metal and nylon lens as the frame and temple, to express a sense of modernity and technology touch.

Butterfly fantasy: Inspired by butterflies, the eyewear brings out the flow of their dancing movement. Each of the lens can be rotated up and down to have an asymmetrical effect and colour variations.

Red string: Based on the Chinese old saying, a red string that ties the knot between two people. You can find the faces of lovers lasered on lens, when a metal wire (symbolizes the string) is passed through the whole frame with no soldering and no screws to create a minimalistic feeling.

## Особенности продукта Product Features

Концепция дизайна является данью уважения китайско-американскому архитектору г-ну Иео Минг Пей, который был известен тем, что использовал базовые геометрические формы, простые поверхности и стекло со стальными конструкциями в своих культовых зданиях. Эти солнцезащитные очки вдохновлены брендом г-на Пейя в архитектуре модернизма - чистым, сдержанным, с острыми краями и неподвластным времени, который состоит из использования четкой металлической конструкции спереди и простых геометрических форм и поверхностей на дужках и форме линз.

The design concept is a tribute to the Chinese-American architect Mr. Ieoh Ming Pei, who was known for his use of basic geometries, plain surfaces, and glass with steel structures in his iconic buildings. This sunglasses are inspired by Mr. Pei's brand of modernism in architecture - clean, reserved, sharp-edged and timeless which are constituted by its use of crisp metal structure on the front, and simple geometric forms and surfaces on the temples and lens shape.
